

COVID-19 Site Operating Procedure & Risk Assessment

This Site Operating Procedures is intended to assist in implementing precautionary measures to reduce the spread of COVID-19 disease. These guidelines are based on Public Health England and Department for Education guidance for educational settings and their key persons and all staff.

We will carry out a risk assessment before opening. The assessment should directly address risks associated with coronavirus so that sensible measures can be put in place to control the risks for children and staff. As an employer we have a duty to consult employees on health and safety, and the employees are best placed to understand the risks at our setting, Mereworth Pre-School.

The new design of our setting affords us the opportunity to operate within relatively small groups and to implement good hygiene practices for non-domestic premises and greatly assist our ability to create physical distance between children and staff **as we have reduced the number of children attending.**

Changes implemented from 8-06-20 to 22-07-20 in purple

Changes implemented from 30-08-20 & 17-09-20

Hand out to all staff from Actions for early years and childcare providers during the coronavirus (COVID-19) outbreak.

3.3 System of controls: protective measures
